GitHub: Lewis-27 | **LinkedIn:** lewis-miller-a788a9331 | **Portfolio:** lewis-miller.dev

PROFESSIONAL PROFILE

Graduate Software Developer with a First-Class BEng in Electronic Engineering and Computer Science from Aston University, including an award for Best Final Year Project. Over the past 18 months I have independently developed and deployed multiple full-stack web applications while working full-time in a customer-facing retail environment.

Experienced in building modern web applications using HTML, JavaScript/TypeScript, React, Node.js, Express, PostgreSQL and MongoDB, with practical experience of authentication, REST APIs, database design, state management and cloud deployment. Recognised for strong problem-solving ability, self-directed learning and effective communication with both technical and non-technical audiences.

Now seeking an opportunity as a Graduate Software Engineer, Junior Full-Stack Developer or Software Developer where I can contribute to real-world products while continuing to develop my technical skills.

TECHNICAL SKILLS

- **Front-End:** React, JavaScript, TypeScript, HTML5, CSS3, TailwindCSS, Bootstrap, React Router
- **Back-End:** Node.js, Express.js, REST APIs, JWT Authentication, Bcrypt
- **Databases:** PostgreSQL, MongoDB, Mongoose
- **State Management & Data:** Redux Toolkit, Zustand, TanStack Query, Axios
- **Development Tools:** Git, GitHub, npm, Vite
- **Deployment & Hosting:** Railway, Netlify, Render

SOFTWARE DEVELOPMENT PROJECTS

Workout Tracker - Full-stack fitness application enabling users to create, manage and track workout routines.

- Live Site: workouts.lewis-miller.dev
- GitHub: github.com/Lewis-27/workout-tracker
- Technology Stack: React, Node.js, Express, PostgreSQL, TailwindCSS, Zustand, TanStack Query, JWT, Git.

Key achievements:

- Designed and developed a complete React, Node.js and PostgreSQL application from concept through to deployment.
- Built secure user authentication using JWT and password encryption with bcrypt.
- Developed RESTful API endpoints supporting full CRUD functionality.
- Designed relational database structure hosted on cloud-based PostgreSQL infrastructure.
- Implemented responsive mobile-first user interface using React, TailwindCSS and shadCN.
- Managed application state using Zustand and optimised data fetching using TanStack Query and Axios.
- Deployed production application using Railway with custom domain configuration.

Blogging Platform - Full-stack blogging platform supporting user accounts and content management.

- Live Site: blog.lewis-miller.dev
- GitHub: github.com/Lewis-27/blog
- Technology Stack: MongoDB, Express, React, Node.js, Redux Toolkit, TailwindCSS, JWT.

Key achievements:

- Developed a complete MERN-stack application with user authentication and content management functionality.
- Created secure API architecture using Express, JWT authentication and encrypted password storage.
- Built MongoDB database layer using Mongoose schemas and models.
- Developed responsive React front-end supporting content creation, editing and deletion.
- Implemented global state management using Redux Toolkit.
- Deployed production application using Render with custom domain.

Personal Portfolio Website - showcasing software development projects and technical capabilities.

- Live Site: lewis-miller.dev
- GitHub: github.com/Lewis-27/portfolio
- Technology Stack: React, Vite, Node.js, TailwindCSS, Git.

Key achievements:

- Designed and developed a responsive React-based portfolio application.
- Implemented component-based architecture with React Router navigation.
- Built mobile-first user experience using TailwindCSS.
- Managed deployment through Netlify with custom domain configuration.

EDUCATION

Aston University, Birmingham

BEng (Hons) Electronic Engineering and Computer Science – First Class Honours

2018 – 2021

Award: Best Final Year Project

- Designed, developed and tested an Arduino based guitar effects processor
- Hardware consisting of an Arduino board with attached ADC/DAC converter
- Software written in C based Arduino code
- Full written report consisting of design, methodology, testing and evaluation

Relevant Areas:

- Software Development
- Programming
- Systems Engineering
- Electronics
- Mathematics

PROFESSIONAL EXPERIENCE

HMV, Solihull | Sales Assistant

July 2021 – Present

- Deliver high-quality customer service in a fast-paced retail environment, regularly resolving customer queries and providing product recommendations.
- Collaborate within a flexible team structure, demonstrating communication, teamwork and adaptability during peak trading periods.
- Take initiative to improve customer engagement through merchandising improvements, local event coordination and operational support.
- Developed strong commercial awareness and understanding of how technology and business systems support day-to-day operations.

ADDITIONAL STRENGTHS

- Strong analytical and problem-solving skills developed through engineering degree and software development projects.
- Proven ability to learn new technologies independently and apply them to real-world applications.
- Excellent written and verbal communication skills developed through customer-facing employment and project work.
- Comfortable working independently while also collaborating effectively within teams.
